TRADEMARK REPORTS

Trademark similarity monitoring services also include monitoring of competing brands. We offer a combination of trademark and brand monitoring reports.

In the reports you will find the current results of a search of key European and world trademark databases. Reports are distributed via email. In addition, the trademark owner can find them on their panel or through notifications in the mobile application.

SETflow

An example of a similar trademark found in the USPTO database of 16.03.2021 under registration number No. 90201106.

An example of a similar trademark found in the USPTO database of March 9, 2021 under registration number No. 90247335.

NEWFLOW

NETLAW

An example of a similar trademark found in the USPTO database of 9.3.2021 under registration number No. 88845701.

Complete results can be found in pdf. These are generated every two weeks.

Monitoring of trademarks in numbers

You will also find the number of processed trademarks in the reports, which were compared with the owner's trademark.

Section 1

Number of trademarks processed to find similarities in the US, UK, EU and DE countries since the beginning of the year.
