TRADEMARK REPORTS

Trademark similarity monitoring services also include monitoring of competing brands. We offer a combination of trademark and brand monitoring reports.

In the reports you will find the current results of a search of key European and world trademark databases. Reports are distributed via email. In addition, the trademark owner can find them on their panel or through notifications in the mobile application.

TiUiT

An example of a similar trademark found in the USPTO database of 01.09.2020 under registration number No. 88622510.

An example of a similar trademark found in the USPTO database of December 8, 2020 under registration number No. 90059646.

TEWITA

TWEET

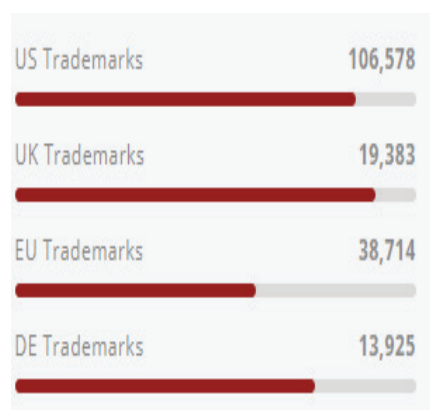

An example of a similar trademark found in the EUIPO database of 18.01.2021 and 26.01.2021 under registration number No. 18361720 and No. 18361722.

Complete results can be found in pdf. These are generated every two weeks.

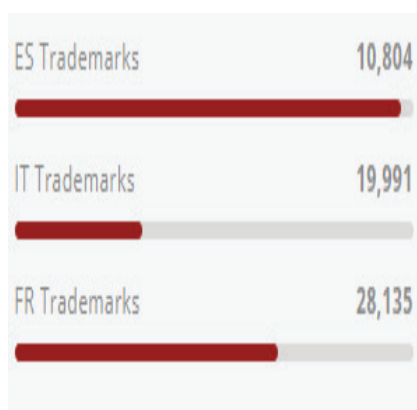

Monitoring of trademarks in numbers

You will also find the number of processed trademarks in the reports, which were compared with the owner's trademark.

Section 1

Number of trademarks processed to find similarities in the US, UK, EU and DE countries since the beginning of the year.

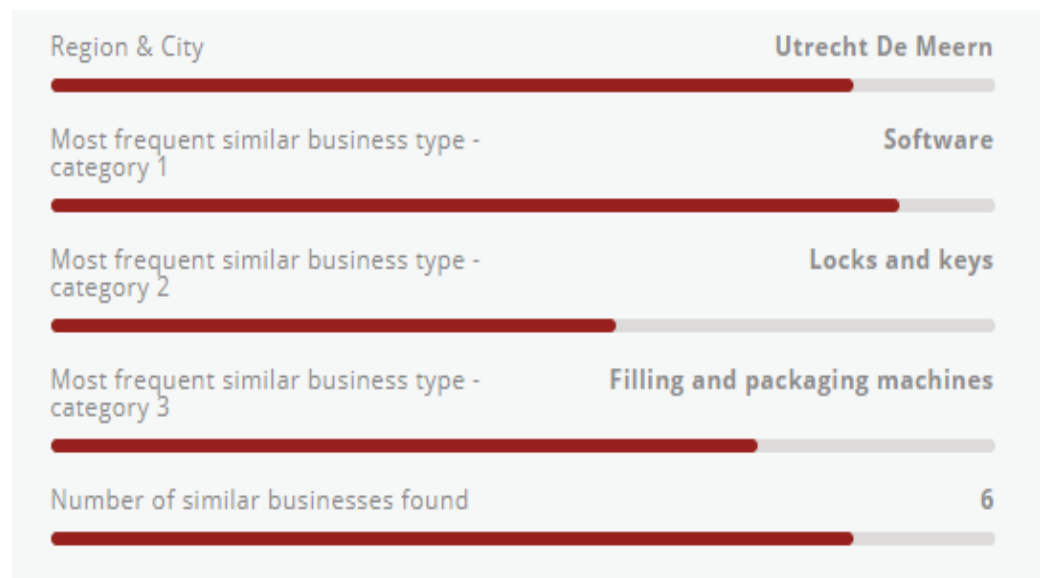

Section 2

Number of trademarks processed to find similarities in ES, IT and FR countries since the beginning of the year.

BRAND REPORTS

An equally important additional service is a search of competing brands and companies, which will help the trademark owner to orientate himself in the world of intellectual property.

In the report, you will find targeted outputs from the region and / or city where you operate, a list of competing companies and the business areas in which they focus. Complete results can be found in pdf. These are generated once per month.

Your Culture
Is Your
bRAND.

The example above shows a summary of brand monitoring results for the Utrecht region. For the last month, 6 competing brands were found and the most widespread business was in the field of software applications, locks and keys and filling and packaging machines.
